Applicators for Balers and Upgrade Kits

- *Find the make and model of the implement being fit*
- *Order the size and control option required*
- *Order the accessories to complement the set-up*

HARVEST *Equipment and Products*
TEC *for Quality Hay.™*

P.O. Box 63 • 2821 Harvey Street • Hudson, WI 54016
800-635-7468 • www.harvesttec.com

The latest preservative applicators and accessories from Harvest Tec.

New this year: The new 400T Series Automatic Applicator that is available for Round and Small Square balers is now compatible with your customer's iPad. The standard Touch Screen Display (TSD) will no longer be a part of the kit. The 400T retains all the capabilities of the previous 400 Series system and can be controlled one of two ways.

- 1.** If the operator has an iPad, they can communicate and control the 400T applicator through the iPad via Bluetooth. The older Harvest Tec touch screen display is not required or needed.
- 2.** If the first option is not available to the operator, or the customer would simply like the original touch screen display, the Harvest Tec touch screen display will need to be used. Please order the appropriate part number below. This will include the display and mount.

<u>Dealer brand</u>	<u>Display P/N</u>
John Deere	030-4670A
Case IH	C4670A
New Holland	HT4670ADS
AGCO	HT4670A

Please see the back page for more information on the applicator and display options available for all models of balers.

Rev. 10/8/2015

2016 Automatic Applicator Display Options

The 400T Series Automatic Applicator and 600 Series Automatic Applicator and Moisture Only System can now be controlled through the operator's iPad. New this season, the 400T kits will NOT come with the standard Touch Screen Display (TSD), and the customer will have a choice on how to control their applicator. For the 600 Series systems, they are still able to run through a VT display, but will also have the ability to run through an iPad if the customer desires. All of the accessories and additional add-on kits will be compatible with either of the systems or sets of controls. Please see the chart below explaining the different control options.

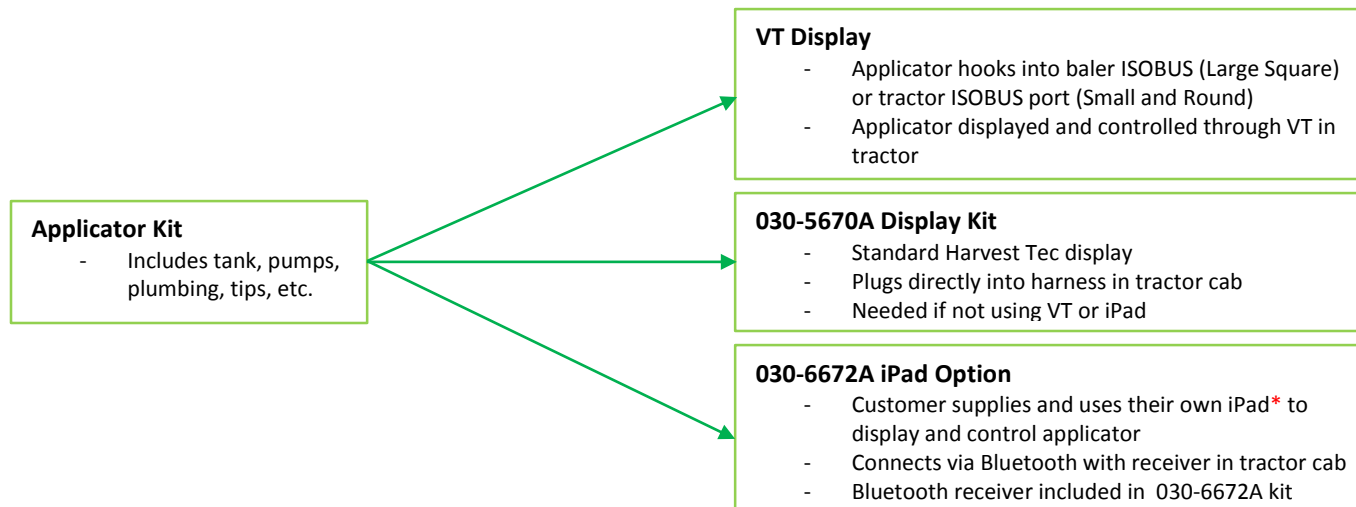

400 Series Automatic Applicator

Customer will order the correct applicator part number from the dealership, and then has the choice of two different display options: using their own iPad via Bluetooth to control the applicator, or the standard Harvest Tec TSD (p/n 030-4670A).

600 Series Automatic Applicator

Customer will order the correct applicator part number from the dealership, and then has the choice of three different display options: running through the VT terminal in the tractor, the standard Harvest Tec TSD (p/n 030-5670A) or using their own iPad via Bluetooth to control the applicator.

*Requirements to run iPad option are 3rd Generation iPad (2012) or newer with iOS8 or greater operating system, plus Harvest Tec App
