GREEN-GARD™
HAY PRESERVATIVE

JOHN DEERE 300
SERIES APPLICATOR

WITH OUR WINNING
COMBO

KEEP YOUR GUARD UP TO PREVENT HAY LOSS

With a **300 Series Applicator** and **John Deere GREEN-GARD™ Hay Preservative**, you can safely bale hay at **moisture levels up to 30%** with a proven system designed for both **round and square balers**. Available at your John Deere dealer, this winning combo offers outstanding benefits for your hay baling operation.

300 SERIES APPLICATOR

- Offers easy installation and maintenance thanks to compact design
- Reads moisture accurately up to 60% for bale wrapping applications
- Applies the precise amount of GREEN-GARD in varying conditions
- Utilizes Apple iPad or iPad Mini as display monitor

(Apple iPad or iPad mini sold separately. Apple and iPad are trademarks of Apple, Inc. registered in the U.S. and other countries.)

GREEN-GARD

- Increases the feed and/or sale value of baled hay by preserving maximum nutritional content
- Enables baling at high moisture levels for heavier, denser bales (adding more tonnage per cutting)
- Extends the harvest window in deteriorating weather conditions
- Safe for farm animals and easy on equipment with a neutral pH of 6.0 – the same as rainwater

WITHOUT GREEN-GARD, THE HIGH VALUE OF YOUR HAY CAN DETERIORATE SIGNIFICANTLY DURING STORAGE!

6% VALUE LOSS

Baled at **18% moisture** without GREEN-GARD hay preservative.

16% VALUE LOSS

Baled at **22% moisture** without GREEN-GARD hay preservative.

19% VALUE LOSS

Baled at **26% moisture** without GREEN-GARD hay preservative.
