

Make a Lasting Impact in Agriculture: Technical Support Specialist Wanted!

Join Harvest Tec: Where Innovation Meets Compassion in Agri-Tech

At Harvest Tec, we believe in harnessing the power of technology not just to innovate but to connect with and improve the lives of our farming communities. As pioneers in agricultural technology, we're seeking passionate individuals who are ready to explore the great outdoors, engage with diverse cultures, and lead the way in sustainable hay technology solutions.

Technical Support Specialist - Be the Change in Agri-Tech

Are you someone who thrives in the great outdoors, values meaningful connections, and is passionate about leveraging technology to make a difference? At Harvest Tec, we're looking for a Technical Support Specialist who is not just adept in technical know-how but also embodies a spirit of service, adventure, and continuous learning. Dive into a role where your love for nature and technology converge to empower farmers and enhance agricultural practices across the globe.

Empower our global farming communities through cutting-edge support, optimize their technological experience, and drive sustainability initiatives to ensure seamless product integration and foster enduring partnerships.

Results to be Enhanced:

1. **Community Impact:** Boost customer satisfaction and community well-being.
2. **Efficiency and Innovation:** Elevate resolution times with innovative solutions.
3. **Sustainable Practices:** Lead and implement quality improvement initiatives with an eye on sustainability.

Skills and Attributes Enhanced:

- **Technical and Environmental Proficiency:** Blend your tech skills with a passion for agriculture and the environment.
- **Service-Oriented Problem Solving:** Use your critical thinking to not just solve problems but to serve our global community.
- **Global Communicator:** Effectively communicate across diverse cultures, fostering understanding and collaboration.
- **Leadership and Team Collaboration:** Lead with humility and collaborate to inspire change.

Responsibilities Enhanced:

- **Outdoor Technical Support:** Engage directly with nature and our farming communities, providing hands-on technical support and education.
- **Sustainable Solution Troubleshooting:** Address technical issues with a focus on sustainable, long-term solutions.
- **Continuous Learning and Innovation:** Stay ahead with ongoing learning opportunities, applying new technologies and practices in agriculture.

Qualifications:

- B.A or B.S. in a related field of Science or Engineering is a plus
- Experience with agriculture equipment
- Knowledge of the Alfalfa and Grass Industry
- Strong verbal and written communication skills
- Excel at problem-solving and analytical thinking

If you are interested in this position, please send your resume and a cover letter to: mrehnelt@harvesttec.com.

Ready to merge your love for technology, nature, and service into a career that makes a tangible difference in the world? Join Harvest Tec, where every day is an opportunity to lead, learn, and lay the groundwork for a sustainable future.

If you're driven by innovation, service, and a commitment to environmental stewardship, we invite you to bring your unique skills and passion to Harvest Tec. Apply now and embark on a journey where your technical expertise meets your love for the great outdoors!
