

## Tank Mounting Kit

For operators running 1835-1842S small square balers, Harvest Tec has designed a new mounting location for the Baler's Choice<sup>®</sup> tank!

The new mounting location for the 25 and 55 gallon preservative tank is conveniently located on the side of the baler instead of the top of the bale chute. This provides the operator a clear line of sight behind the baler to view the bales in the field or additional implements in use!

The side mounting kit can be included as part of a new preservative applicator system for the baler, or as an update to a baler with the preservative system already mounted.

Available in either the Electronic Applicator for simple, easy application, or the Automatic Applicator that allows customers to monitor moisture and apply hay preservative automatically and accurately on their hay crop.

## Bale Up To 30% Moisture

Start Earlier • Bale Later • Reduce Spoilage • Protect Quality

- ✓ Bale at higher moisture
- ✓ Prevent mold and heating
- ✓ Higher feed value
- ✓ Store longer
- ✓ Easy, consistent application
- ✓ Non-corrosive formula
- ✓ Works on ALL hay types
- ✓ Won't freeze or lose effectiveness

## Why Hay Spoils

16-22%: Heating

23-26%: Browning

27%+: Fire Risk

## How Baler's Choice<sup>®</sup> Works

Buffered propionic acid stops mold & heating while staying safe on equipment.

Added ingredients maintain color and ensure even coverage

Baler's Choice <sup>®</sup> Hay Preservative
