

Information Bulletin Tablet Requirements

for H2O, 300, 600, & 700 Series Automatic Applicators

As an industry leader in baler moisture sensors and precision preservative applicators, Harvest Tec continues to develop systems utilizing tablet technology. As of 2017, Harvest Tec utilizes Apple iPads and Android tablets for control of various systems using the charging cable for power and data transfer. This bulletin highlights key requirements for tablet usage.

- Tablets should utilize quality cables capable of charging and data transfer.
- Original charging/data transfer cables are preferred. Replacements should be of equal quality to allow for proper data transfer.

- USB-A to USB-C cables can be utilized. USB-C cables with adapters are NOT supported.
- iPad 1st Gen with wide plug NOT supported.

030-6672C - IIC for 300 & 600 Series (HAY APP)

006-6673 - ICM for 700 series
(PRECISION BALING APP)

006-2473 - Module for H2O kits
(H2O APP)

iPad with original lightning charging cable is preferred

iPad 6th generation (or newer) using USB-C to USB-A can be

Charging cables with adapters not supported

1ST Generation iPads are not supported

Contact Harvest Tec if there is an Apple iPad compatibility question for use with your Harvest Tec Device

Field ready iPad mini options from Harvest Tec

 030-4670DK – iPad mini 4 (refurbed) with case, spring loaded cradle RAM Mount, and come with all Harvest Tec apps are preloaded

Approved charging cable options from Harvest Tec

- 006-6672USBC 6' Apple Lightning plug to USB-A (for use with most older iPad & iPad Mini, Gen 2 thru Gen 5).
- 006-6672USBX 6' USB-C plug to USB-A plug (for use with iPad 6th generation and newer).
