

New HayBoss Tank Mounting Kit Promo 226-1

For operators running 1835-1842 small square balers, Harvest Tec has designed a new mounting location for the hay preservative tank!

The new mounting location for the 55 gallon preservative tank is conveniently located on the side of the baler instead of the top of the bale chute. This provides the operator a clear line of sight behind the baler to view the bales in the field or additional implements in use!

The side mounting kit can be included as part of a new preservative applicator system for the baler, or as an update to a baler with the preservative system already mounted.

Available in either the Electronic Applicator for simple, easy application, or the HayBoss Automatic Applicator that allows customers to monitor moisture and apply hay preservative automatically and accurately on their hay crop.

1835-1842 Small Square Baler Applicators

HT3444417C	300 Series Hayboss Automatic Applicator *Requires iPad as display
HT4344417	Electronic Applicator

Upgrade from Top Chute Tank Mount Location

H30-434SSM	Side Saddle Mount Kit *Brackets only – 55 gal tank and metal straps are reused
