

ERADI(Ca)TE PLUS

A Water Conditioner

PRODUCT DATA SHEET

Product Description

ERADI(Ca)TE PLUS is a specialty water conditioner designed to prevent hard water scale build-up AND to remain stable in high temperature applications including heat exchangers, boilers, and steam generators.

Common hard water scale formation is the result of calcium carbonate precipitation and accumulation in equipment employing hard water. ERADI(Ca)TE PLUS will bind with calcium, magnesium and iron, preventing the formation of common hard water scale.

ERADI(Ca)TE PLUS can also be used to treat water prior to diluting fertilizers, herbicides, and pesticides; promoting maximum glyphosate efficacy and minimizing insoluble solids that can form when minerals precipitate with phosphates. (Precipitated solids can inhibit uniform application rates and/or plug sprayer nozzles.)
